Professional Summary

Full Stack Developer with 2+ years of experience building scalable web applications using React, Next.js, TypeScript, Node.js, and MongoDB. Skilled in both frontend UI/UX and backend API/database integration, with strong proficiency in RESTful APIs and cloud deployments. Fluent English speaker with confidence in client-facing interviews and technical discussions. Committed to delivering clean, efficient code and collaborating in agile environments.

Technical Skills

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), Tailwind CSS, Bootstrap, Framer Motion, Responsive Design, Figma (basic)

Backend: Node.js, Express.js, MongoDB, Prisma, PostgreSQL, RESTful APIs, Authentication, Database Management

DevOps/Other: Git, GitHub Actions, CI/CD (basic exposure), Vercel Deployment, Debugging, Performance Optimization

Soft Skills: Fluent English, Strong Communication, Client-Facing Confidence, Problem-Solving

Projects

Hotis Studio Editor – Full Stack Project (Work in Progress)

- Purpose: Building a specialized email layout architect to explore complex drag-and-drop state management.
- Technical Stack: Next.js, TypeScript, Tailwind CSS, Prisma/PostgreSQL.
- Current Focus: Implementing a flexible JSON-based schema to store and render custom layout blocks.
- UI/UX: Minimalist dark-mode aesthetic with optimized spacing and typography.
- Demonstrates initiative in tackling advanced editor functionality, scalable state management, and database-backed layouts.

Smooth Ride Bikes – Full Stack Dashboard App (Next.js, React, Node.js, MongoDB)

- Originally developed for Honda Manufacturing Nigeria, adapted into Smooth Ride Bikes for portfolio purposes.
- Built responsive admin dashboard with role-based access, analytics, and data tables.
- Designed backend API routes for dealer/customer registration and integrated MongoDB for data persistence.

- Added barcode scanner functionality and CSV export features.
- Deployed on Vercel; app can be explored live (dealer registration and dashboard accessible without login).

Hotel Booking App – Full Stack Simulation (React.js, Tailwind CSS, Mock APIs)

- Designed product listing and cart components with smooth UI interactions.
- Managed state using React Hooks and integrated mock APIs to simulate backend logic.

Cryptocurrency Price Tracker – Frontend + API Integration (React.js)

- Integrated real-time crypto API to display live prices.
- Built search and filter functionality for user interaction.
- Optimized rendering performance to meet Core Web Vitals standards.

Coffee Website – Frontend Project (React, Tailwind CSS)

- Developed a responsive marketing-style site with navigation, hero section, product listings, and testimonials.
- Focused on clean UI design, typography, and optimized rendering for smooth user experience.

Airpod Slider Project – Frontend + Motion (React, Tailwind CSS, Framer Motion)

- Built interactive product showcase slider with dynamic background transitions.
 - Implemented polished animations and micro-interactions using Framer Motion.
-
